📇 PROFILE

Full-stack developer specializing in the MERN stack, with hands-on experience building real-world web applications.
Passionate about backend development and clean architecture. Actively seeking opportunities to grow in a professional team environment.

🎓 EDUCATION

2021 – present	**Computer Engineering** Misr University For Science and Technology

🧠 SKILLS

JavaScript ES6	**Reactjs**
Node js	**Redux**
Expressjs	**MongoDb**
Git & Github	**Rest API**
HTML	**CSS**
Tailwind	

📂 PROJECTS

E-commerce Website
full-stack shopping platform developed using the MERN stack.
It includes product browsing, cart management, and a secure checkout flow.
An admin dashboard allows full control over products (add/edit/delete).

E-learning Platform
full-stack MERN application that allows users to browse, purchase, and access online courses.

The system features secure authentication (JWT), dynamic course display, access control (only enrolled users can view course content), and a dashboard for managing user progress.
Built with React, Node.js, MongoDB, and Tailwind for a responsive UI.

To-Do App
Basic CRUD React app connected to Node backend

DevConnector
full-stack social network app built with the MERN stack.
It allows developers to register, create profiles, share posts, and connect with others.
